SOLUTION OVERVIEW:

○ We're on our smartphone all the time. Might as well be able to recruit top talent while you're there. As a recruiter who's constantly on the go, you can't afford to sacrifice your productivity when you're away from the office. When that prized candidate contacts you to schedule an interview or discuss counter-offer, every minute you don't respond means they go elsewhere.

○ So, our Interview Scheduling App- HiRE would definitely do the needful to coordinate the candidates and the Interviewer. The **Home Page** is the Login page which enables the candidate or the Interviewer to login by entering the Password.

○ The Candidate has to fill a registration form, wherein he is required to enter the basic mandatory details and also upload the Resume so the Interviewer can view at any time.

○ On clicking the specific Candidate name, the **Candidate Details** can be viewed by The Interviewer and the Same Page is editable by the Candidate wherein he is also able to download the **Assessment Notes** to know in brief about the Screening Levels and can also take the Sample Test.

○ When the Interviewer logs in, He is able to see a Dashboard, where the **Interview status** of the candidates and the level of screening along with Candidate name and Interviewer name is visible. The Interviewer can click the Fix Time Slot Button to Schedule his/her convenient time for the Interview.

○ In the Scheduling Page that slides up on clicking the Fix time slot button, the Interviewer can **Schedule time slots** for various candidates based on his convenience.
